

Dear Parents,

I need some volunteers to make modeling clay for a class activity on the date shown below. Would you be willing to create one recipe of this dough? *You need to do this with your child because it involves cooking the dough.* Please sign the slip at the bottom and return it so I'll know how many students plan to make the dough. Thank you!

Modeling Clay Recipe

What you need:

- * 1 cup flour
- * 1/2 cup salt
- * 2 teaspoons cream of tartar
- * 1 cup water
- * 1 tablespoon vegetable oil
- * Food coloring to your liking

What to do:

1. Combine the dry ingredients, then the liquids in a pan.
2. Heat slowly, stirring constantly, until thickened.
3. Remove from heat, take out of the pan and knead until smooth. The dough should be very stiff. If not, add more flour.
4. Store in an air tight container.
