

High Roller

Comparing Fractions Game

Group Size: Pairs

Directions:

1. Work with a partner, and roll to see who will go first. You will each need a Comparing Fractions Chart.
2. The first player rolls both dice to create a fraction. The smaller number is the numerator and the larger number is the denominator. Both players record the fraction in their Player 1 column.
3. The other player rolls the dice and both players record the fraction in their Player 2 column.
4. Decide which fraction is the larger of the two, and circle that fraction on the chart. Explain your answer by using pictures, words, or symbols. It's okay to help each other!
5. The person with the larger fraction scores a point.
6. Continue as time allows. Tally the points at the end of the game.

Materials

- ♦ two dice
- ♦ Comparing Fractions Charts

Challenge Variation:

Use a set of number cards (1 to 9) instead of dice. Randomly draw 2 cards to create your fraction.

Player 1 _____

Player 2 _____
