

Sample Line Plot

Survey Question: How many pull-ups can you do without stopping?

Create Your Own Line Plots

Think of a question that will result in a number response. Draw a line, mark off a sequence of numbers, and start collecting data. Record one X above the line for each response. Here are some questions to get you started:

- How many pieces of pizza do you usually eat?
- How many pets do you own?
- How many books did you read over the summer?
- How shoes do you have in your closet?
- How many stuffed animals do you own?
- How many phone calls did you make yesterday?
- How many people are in your family?
