

Teaching Social Skills

Steps

1. Choose a skill that your class needs to improve.
2. Introduce the social skill to your class using the T-chart or a role playing activity.
3. Involve students in a cooperative activity that will encourage them to use this skill.
4. During the activity, stop and ask students to reflect on how they are using the skill.
5. After the activity, have students evaluate how well they used the skill (written or informal).

Notes:
