24 Weathering, Erosion, and Deposition Boom Cards

Rocks and soil trapped in a glacier being carried down a mountainside

deposition weathering erosion

Mud and debris covering the road after a mudslide

weathering deposition erosion

A floodplain forming next to a river when floodwaters recede and deposit soil and sediment

deposition erosion weathering

Glaciers dropping rock and debris to form terminal moraines

erosion deposition weathering

Flood waters pounding against a canyon wall and wearing it away

deposition weathering erosion

A muddy delta forming at the mouth of a river

deposition erosion weathering

Hurricane storm surge waves carrying soil away from a cliff

erosion weathering deposition

Sandbars forming when sand is dropped by slow-moving waves

weathering deposition erosion

Wind blasting sand particles at rock and carving out smooth arches

weathering erosion deposition

Strong winds blowing loose soil across a vacant field

deposition weathering erosion

A tornado picking up soil and forming a twister that speeds across the countryside

deposition weathering erosion

Layers of sand and sediment accumulating on the ocean floor

weathering deposition erosion

Glaciers scraping along the earth's surface and wearing away the rock

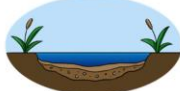

weathering erosion deposition

Water trickling into cracks in rocks, freezing, and breaking them apart

deposition erosion weathering

A pond filling up with sediment

deposition erosion weathering

Wind blowing particles of sand across the top of a sand dune

weathering erosion deposition

Muddy water flowing in a fast-moving river after a hard rain

deposition weathering erosion

Stalagmites forming on a cave floor due to a build up of minerals

weathering deposition erosion

Waves pounding against a rocky cliff, wearing away the softer rock to form sea stacks

deposition erosion weathering

Rocks in a streambed being worn smooth by fast-moving water

deposition erosion weathering

Soil under cracked pavement being washed away, causing potholes to form in a road

deposition weathering erosion

A stream rushing down a steep hillside carrying mud and soil

deposition erosion weathering

Roots growing into cracks in a boulder and breaking the rock apart as they grow

weathering erosion deposition

Acid rain dissolving underground limestone causing sinkholes

erosion deposition weathering
