Some tasks will require you to find the total money value of a group of coins. Click Next to find step-by-step directions that explain how to do this.

©2022 Laura Candler's Teaching Resources - www.lauracandlerontpt.com

First, sort the coins so the same types of coins are together. Count the number of coins in each group.

1 quarter

3 dimes

2 nickels

3 pennies

©2022 Laura Candler's Teaching Resources - www.lauracandlerontpt.com

Next, figure out the value of each group of coins.

1 quarter

25¢

3 dimes

30¢

2 nickels

10¢

3 pennies

3¢

Tip: You can use skip counting, addition, or multiplication to find the value of each group.

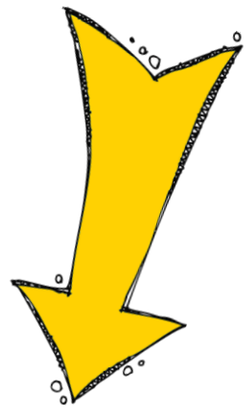
Finally, add the values of all 4 groups to find the total amount of money.



25¢ + 30¢ + 10¢ + 3¢ = 68¢

The total coin value is 68 cents. This amount could also be written as $0.68.
