How to Access Your Boom Cards

Thanks for your purchase! Boom Cards are interactive, digital task cards hosted on the Boom Learning platform. You can assign them from the Boom website or via Google Classroom or other learning management systems like Seesaw, Canvas, and Moodle.

There are two versions of this product, one with audio and one without audio. Both decks are similar, but the cards in the audio deck include a sound icon in the upper left corner that students can click if they want to hear the words on the card read aloud.

Decide whether you want to add one or both decks to your Boom Cards Library and click the corresponding covers on the right. If you have an existing account, you'll be asked to log in and those decks will be added to your Library. If you don't have a Boom account, please read the information on the next page before you click the links.

Click below for the deck WITH AUDIO.

Click below for the deck WITHOUT AUDIO.

Identifying U.S. Coins Boom Cards

- ✓ This deck includes 30 self-checking, interactive cards that will help your students learn to identify 4 commonly-used American coins.
- ✓ The first 7 cards are review cards. The remaining cards are shown in random order. They include a variety of tasks that ask students to identify images of pennies, nickels, dimes, and quarters. Other tasks include matching coins with their values.
- ✓ If some of the cards are too challenging for your students, you can hide them by using the Custom Play Settings before you assign the deck.
- ✓ All Boom Cards use sound as a part of the self-checking feature, including the version of this deck labeled as "without audio." Students will hear a high-pitched "ding" for correct answers and "whoops" for incorrect answers. The difference between the two decks is that each card in the audio deck has an icon in the upper left corner that students can click to hear the words read aloud.

More Information about the Boom Learning Platform

- ✓ To use Boom Cards, you must be connected to the Internet. Boom Cards play on modern browsers (Chrome, Safari, Firefox, and Edge). Apps are available for Android, iPads, iPhones, and Kindle Fires.
- ✓ If you use Google Classroom, you can import your class roster into your Boom Learning account to easily create student accounts. You can also assign Boom Cards to your students through Google Classroom.
- ✓ No matter which type of account you have, free or paid, you can use the Fast Play option to assign Boom Cards to your students. However, you won't be able to hide any cards or change the number of cards shown to students during each round of play. For additional options and data tracking, you'll need one of their many premium accounts. If you are new to Boom Learning, you will be offered a free trial of their premium account to help you decide if these features are worth the investment. Click here to learn more about pricing and features.
